Posture Toward Minimizing Mexican Cartel Influence:

The Miami-Dade Sheriff should establish an official recognition of the Mexican Cartels being a single unified political body on matters concerning mitigating organized crime reaching into Miami-Dade County, and therefore should officially seek to create an extra seat for a unified Mexican Cartel to sit at the Public Safety table of the Organization of American States (OAS) allowing for Cartel in-person engagement in policy discussions, thereby compelling Cartel Honchos to shed the power afforded by anonymity, whereas open debate via its own Cartel political Envoys would also allow for the unified Cartel to be eligible for official political Partnerships within the OAS committee system AFTER corporate & banking information gets submitted.

Regardless of if the Cartels agree to submit its organization into the official political body arena, the MDSO can still seek for the OAS to recognize the Mexican Government as a bifurcated political body and therefore withhold certain privileges until such time that the Mexican Government submit its entire government to the public record which would include Cartel-controlled shadow Government bona fides. Once Cartel secrets are public policy, they can finally be sanctioned just like any other political power.
